Engaging with and supporting the Ukrainian higher education sector has been foremost in EUA’s work over recent months. Consequently, I am delighted to inform you that the EUA Board has approved the application of the Union of Rectors of Higher Education Institutions of Ukraine to become a collective member of EUA. They become the 35th national rectors’ conference to be part of EUA. We are also very pleased to welcome Taras Shevchenko National University of Luhansk as our 27th individual member university from Ukraine.

EUA has strongly welcomed the European Commission’s announcement of the new MSCA4Ukraine scheme, funded under the Horizon Europe programme’s Marie Skłodowska-Curie Actions. We are extremely proud to be part of the consortium implementing this important initiative and look forward to working alongside our partners in the project to disseminate the scheme and to ensure the successful rollout of its matchmaking and advisory services for researchers and prospective host organisations over the coming months.

Since last writing to you, there have also been significant developments in the area of research and innovation. In line with our long-standing commitment to the advancement of the European Research Area, EUA has expressed its commitment to the 18 actions of the new ERA. At the start of this month, EUA also reacted to the European Commission’s communication on a New European Innovation Agenda, welcoming this move towards tackling the bottlenecks which stunt Europe’s innovation performance, but also highlighting several elements which we hope will be considered in the implementation phase, notably to reflect the contribution of the higher education sector.

With that, I would like to wish you all a safe and enjoyable summer break. The next edition of our newsletter will come to you in September. There is already plenty on EUA’s agenda for the latter half of this year, some of which you can get an idea of from the items below.
